AMD DEVELOPER HACKATHON ACT III · REINVENT COMMERCE · EVOLUS BUSINESS AGENTS

MarginArena AI

Join 11.11, or skip it?

Checks every invited product before a Thai Shopee Seller joins, and gives each a plain Verdict.

Approve — join as invited

Revise — join with a better plan

Skip — don’t join

Escalate — the owner decides

marginarena.vercel.app · Gemma-4-31B-IT on AMD Token Factory

PROBLEM · SHOPEE NON-MALL PRIME

At 20% off, it takes 3.2× the units to earn the same

Per-unit profit: ฿100 product, ฿50 cost

Full price	**20% off**	30% off
+฿21.11	**+฿6.67**	**−฿0.55**

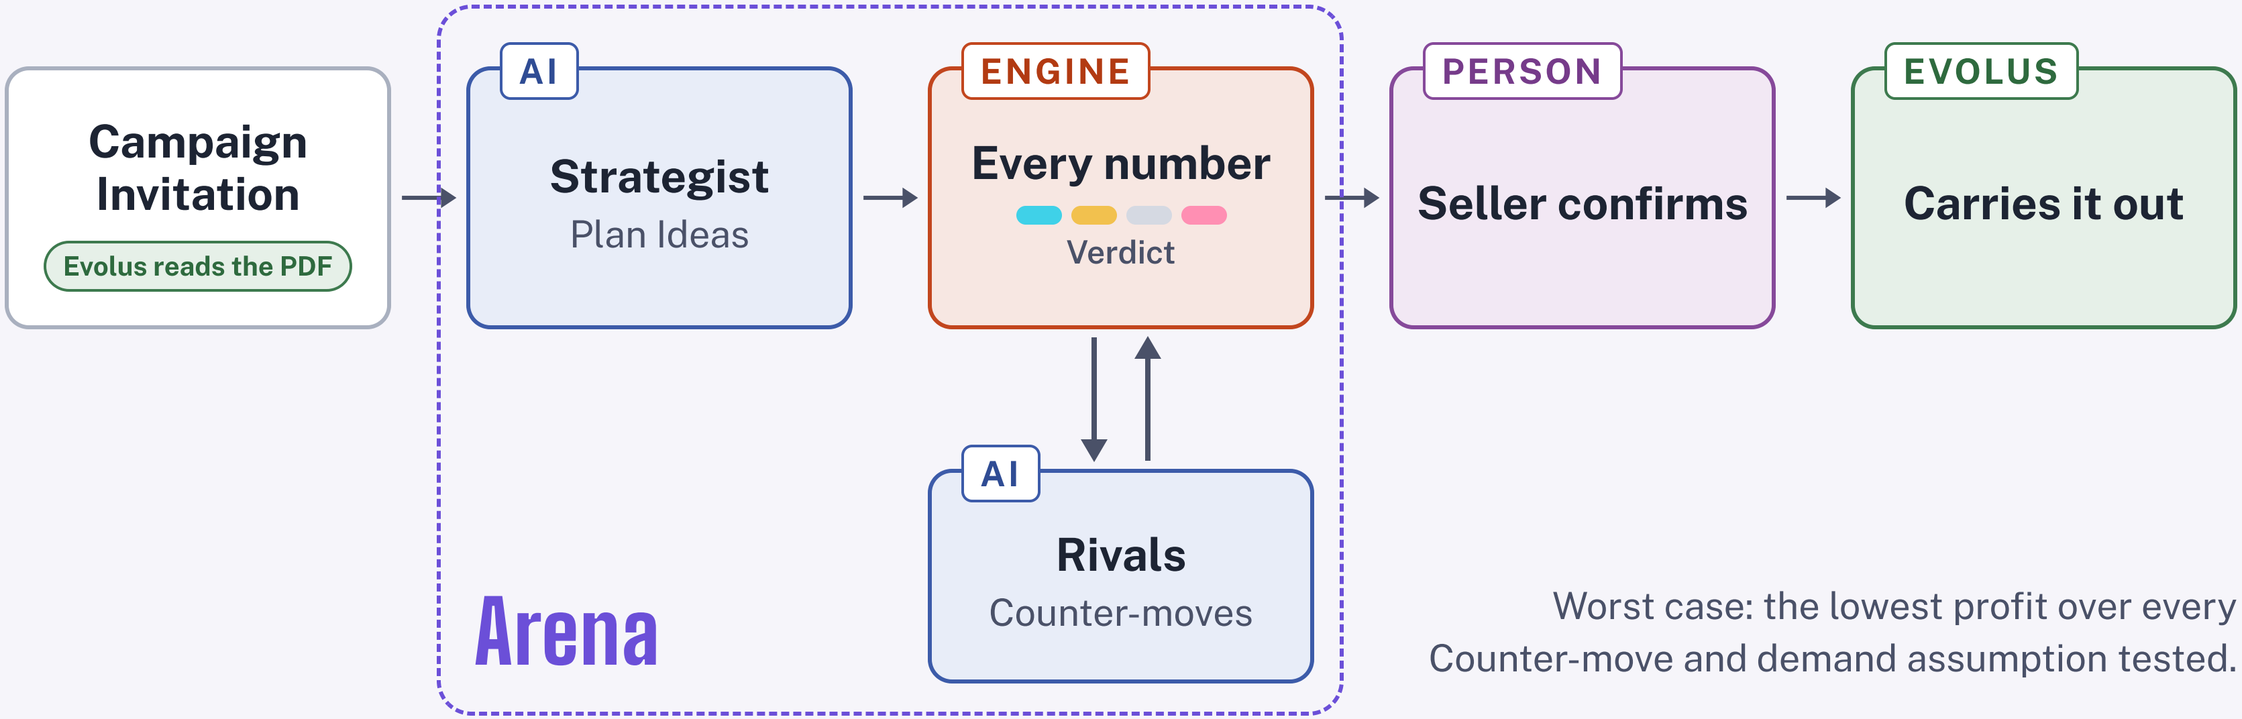

3.2× ≈ ฿21.11 ÷ ฿6.67, our arithmetic

An 11.11 Campaign Invitation asks **15–25% off**. Fees (three rises in 2026) take **27.82% + ฿1.07** per order. Extra sales and competitors' replies are unknown.

SOLUTION

AI proposes, the engine decides, you confirm

AI Rivals red-team your plan with Counter-moves; the engine keeps the best worst case.

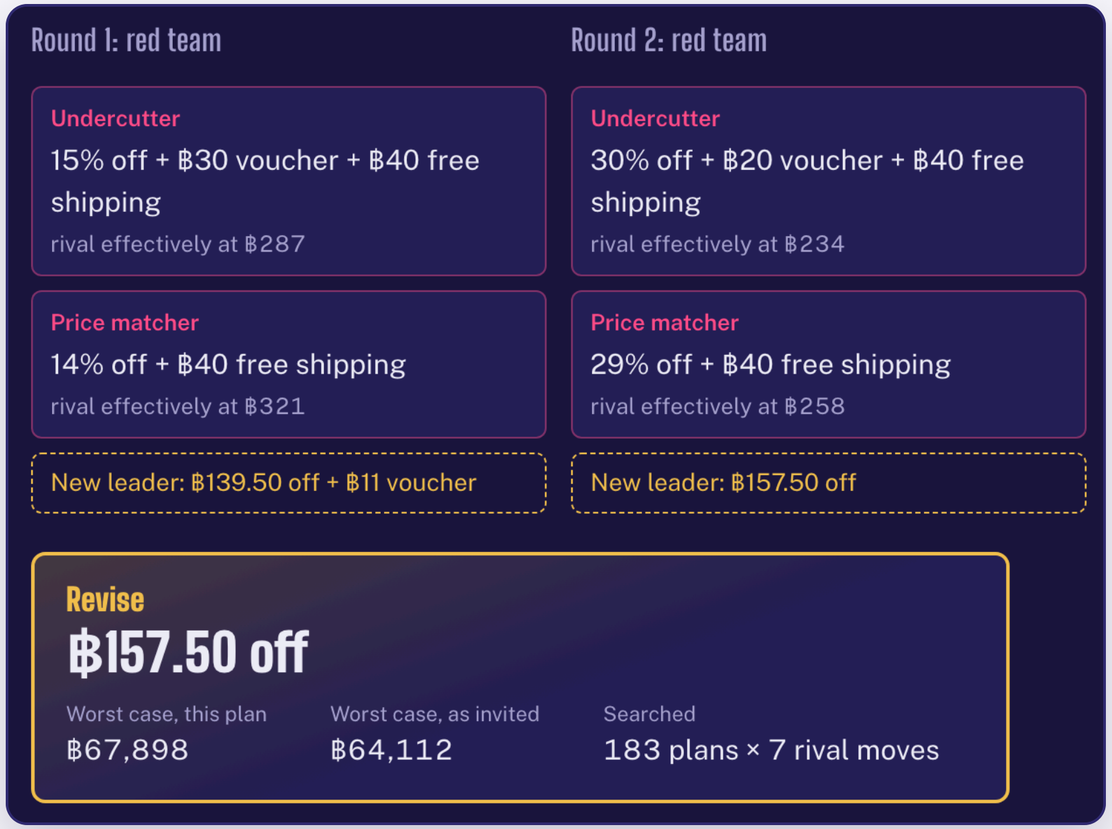

Worst case: the lowest profit over every Counter-move and demand assumption tested.

DEMO

Rivals red-team, the engine re-prices, each round

Recorded on AMD Token Factory: 12 products, 1 Strategist + 2 Rivals each, 2 rounds. Replays in about 20 seconds; no key.

12 VERDICTS

- 8 Approve
- 1 Revise
- 2 Skip
- 1 Escalate

explained in Thai or English

Sunscreen: labelled demo override, set more price-sensitive on purpose. At our own fit, it’s an Approve.

IMPACT

Two Skips beat joining as invited

฿1,648.50

more profit in the worst case

+32.8% and +34.2%

Margin Protected

฿5,434.46

with a labelled demo override

Plans that break a check

0 of 11 MarginArena **2** as invited

Margin Floor · Brand Price Rule · invited discount · ≥ not joining

Fictional shop, engine estimates, **2.5× Campaign traffic assumed** (at ×3.0, both Skips become Escalates).

TECHNOLOGY

Gemma for language, the engine for numbers

Every model call we make goes to **AMD Token Factory**.

Why AI: Plan Ideas, Counter-moves with a reason, Thai and English explanations.

61.69%

Gemma's profit math alone: median error

60 of 60

valid answers, recorded run

32 of 32

first drafts passed the number check

Rule-based or random Rivals, same Plan Ideas: same 12 Verdicts

EVOLUS

Evolus reads the invitation, carries out Verdicts

EVOLUS

Extractor

reads the PDF · checked: **12 of 12** match

Arena → Verdicts

PERSON

Seller confirms

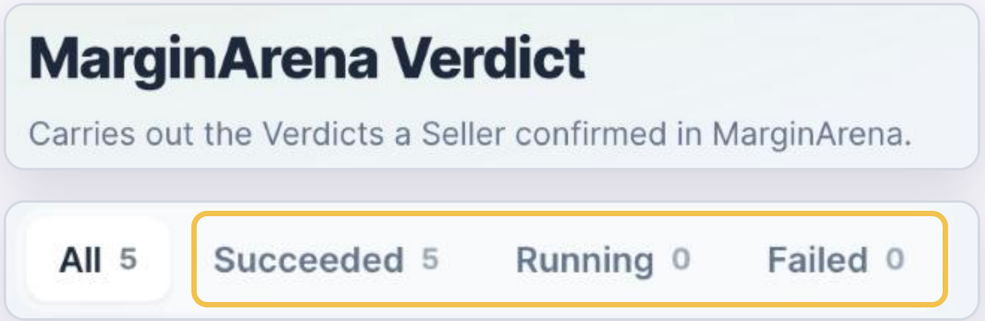

EVOLUS

Workflow

bulk-upload file · **0 Evolus credits**

Agent + knowledge library: drafts
the owner's approval request

5 of 5 runs succeeded · nothing sent

Built from code via the Evolus API; agents on "tf-gemma on AMD" (Gemma or Qwen fallback).

COMPETITORS

No tool we found tests an invitation first

TOOL	STRENGTH	GAP
BigSeller, ZORT	profit reports	only after the sale
KhumMai, GetOneCart	fee calculators	one unit, no demand
Shopee Easy Nomination	inside Seller Centre	needs your floor price
MarginArena	**Verdict before you join**	sample shop only so far

Our edge: each invited product is tested against Counter-moves and demand first.

MARKET AND REVENUE

SAM ≈฿795.6M a year at Pro ฿390

TAM ≈฿5.62B

a ceiling: ≈1.2M Thai MSME shops on Shopee

SAM ≈฿795.6M

≈170,000 Sellers who reached new customers in 9.9 (our proxy)

SOM ≈฿39.8M

5% of SAM (assumption)

PRICING

- Free
- **Pro ฿390/mo**
- Agency ฿1,990/mo
- Enterprise

Estimates; pricing assumed. On the sample shop, the two Skips are worth about **4.2 months of Pro**.

THE ASK

Next: a 12.12 pilot with Thai Sellers

No real Seller has used MarginArena yet. We are looking for Sellers to measure demand and competitors' moves on real sales.

1 Pilot → 2 Own data, private endpoint → 3 Lazada, TikTok Shop

Go-to-market (planned): Seller communities and agencies

Solo, from Thailand
